DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

10-33,35-47
45 64
3-6
Group I, claim(s) 1-7, 9-47 & 65-69, are drawn to methods for a receiver interacting with broadcast services, including receiving data, separating data & storing data, and modem operation.

Group II, claim(s) 46-60, are drawn to algorithms for a user navigating through multiple menu when purchasing various goods and services.

Group II, claim(s) 61-64, are drawn to method for receiving and extracting program guide data from TV signals.

Art Unit: 2611

2. The inventions listed as Groups I-III are not directed to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-III are independent and distinct from each other.

In particular, Group I claims are directed to a receiver which receives image data and information data; the receiver includes a decoder for separating the image data from the information data; the receiver stores the received information data; the receiver includes a modem which responsive to command signals from a user, varies an interactive image which causes the modem to transmit/receive on-line to/from a remote site. Group I are generally classed in 725/135-136, Video Distribution System With Local Interaction.

Group II claims are independent and distinct from Group I & II claims, and are directed to various algorithms for enabling a user to navigate through a series of interactive menus, when ordering or purchasing goods/services from remote sites. The special technical features recited in claim 46 which separate from Groups I & III, is directed to a user selecting goods/services from a series or levels or directly from a predetermined level. Group II claims are generally classed in 725/60, Interactive Product Selection and/or 705/26-26, Electronic Shopping, Presentation of Image or Description of Sales Items, (e.g. electronic catalog browsing).

Art Unit: 2611

Group III claims are separate and distinct from Groups I & II, and are directed to receiving program schedule guide data. Group III claims are generally classed in 725/39, Electronic Program Guide. The transmission/reception and display of Electronic Program Guide material as recited in Group III claims are different inventive concepts from the subject matter recited in Groups I & II.

3. A telephone call was made to Thomas McKiernan, Esq. on 12/3/2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
